

I do not want to lose my local weather and traffic on XM radio. I find it appalling that the NAB is trying to make XM Radio stop this service. I have the right as a paying subscriber to have this information to listen to since it is offered.

I do not listen to FM or AM radio anymore since I find that the service they provide me for free is worthless. I'm tired of 25 minutes of commercials just to not get the information I'm waiting to hear.
